

Design a controller with servlet that provides the interaction with web application

Registration.html

[illegible]

```
<input type="Submit" value="Register"/>
</form>
</body>
</html>
```

RegisterApp2018.java

```
import java.io.*;
import java.util.*;
import javax.servlet.*;
import javax.servlet.http.*;
import java.sql.*;
// Extend HttpServlet class
public class RegisterApp2018 extends HttpServlet
{
    public void doPost(HttpServletRequest request, HttpServletResponse response)throws
    ServletException, IOException
    {
        response.setContentType("text/html");
        String fn=request.getParameter("nametxt");
        String pw=request.getParameter("pwdtxt");
        String ei=request.getParameter("emailtxt");
        String pn=request.getParameter("phtxt");
        String dob=request.getParameter("dob");
        String g=request.getParameter("gender");
        String add=request.getParameter("addtxtarea");
        String[] la=request.getParameterValues("lang[]");
        String lang = String.join(" ", la);
        PrintWriter out = response.getWriter();
        out.println("<h1>Registration Details</h1><br>");
        out.println("<b>First Name</b>:" + fn + "<br>");
        out.println("<b>Email</b>:" + ei + "<br>");
        out.println("<b>Password</b>:" + pw + "<br>");
        out.println("<b>Phone Number</b>:" + pn + "<br>");
        out.println("<b>Gender</b>:" + g + "<br>");
```

```

out.println("<b>DOB</b>:" + dob + "<br>");
out.println("<b>Languages Known</b>:" + lang + "<br>");
out.println("<b>Address </b>:" + add);
try
{
Class.forName("com.mysql.jdbc.Driver");
Connection
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/2018","root","");
String sql="INSERT INTO registration VALUES(?,?,?,?,?,?,?)";
PreparedStatement pst = con.prepareStatement(sql);
pst.setString (1,fn);
pst.setString (2,pw);
pst.setString (3,ei);
pst.setString (4,pn);
pst.setString (5,g);
pst.setString (6,dob);
pst.setString (7,lang);
pst.setString (8,add);
pst.execute();
out.println("<br>Record inserted successfully.. Registration was
completed...</body></html>");
con.close();
}
catch(Exception e)
{
out.println(e);
}
}
}

```

Web.xml

```

<web-app>
<servlet>
<servlet-name>Reg</servlet-name>

```

```
<servlet-class>RegisterApp2018</servlet-class>  
</servlet>
```

```
<servlet-mapping>  
  <servlet-name>Reg</servlet-name>  
  <url-pattern>/Register</url-pattern>  
</servlet-mapping>  
</web-app>
```
